EDUCATION

Vellore Institute of Technology, Vellore, Tamil Nadu, India.

Expected Graduation: June 2024

Bachelor of Technology **Information Technology**

SKILLS

- **Computer Languages** – Javascript, Typescript, C/C++, Java, Python, HTML, CSS
- **Most experienced** – Full Stack Development, Frontend Development, Machine Learning, **AWS (Cloud Practitioner Certified)**
- **Frameworks/Tools**: ReactJS, Redux, Django, FastAPI, NextJS, Tailwind CSS, Numpy, Pandas, Tensorflow, GitHub, Jira, Slack
- **Data Structures & Algorithms**: in C++, solved 200+ quality problems on Leetcode, 1400+ on Codechef
- **Databases**: MongoDB, SQL, PostgreSQL, SQLite, Firebase
- **Computer Fundamentals**: object-oriented design, algorithm design, problem solving, operating systems, networking

WORK EXPERIENCE

Software Development Intern – TIFAC Lab VIT

April 2023 – Present

Remote, India and Vellore, Tamil Nadu, India

- **Designing and developing** production level commercial projects which VIT takes with clients including hospitals, clinics etc
- Developing a full fledged management system with **CRUD of multiple models** using **Redux, ReactJS and TailwindCSS**
- Implementing **clean coding** practices and folder structure, maintaining servers, CI/CD pipeline using Git

Software Engineer Intern – Quinn

May 2023 – June 2023

Remote, India

- **Designing and developing** a data-heavy, production level SaaS analytics tool, collaborating with Product Manager
- Developing the frontend using **Redux, ReactJS and TailwindCSS** and backend using **NodeJS, Express, Prisma**.
- Writing **clean and easily maintainable code** with a focus on reliability and scalability using editor and prototyping tools

Cyber Security Product Developer Intern - SecLogic Ltd

May 2021 – Feb 2022

Remote, India

- Developed the **front-end** of one of their flagship product ORO in ReactJS, as per UI on Figma
- Worked on **production level issues** and fixing bugs, which **reduced loading time by 20%**
- Learning and working with **different JS libraries** like Amcharts, Material UI, etc, which **improved code structure** and quality.

Technical Head – VITrendz Student Community, Largest in VIT

March 2021 – Aug 2022

Vellore, Tamil Nadu, India

- **Managing the entire life cycle of all the projects** made on vitrendz.com, from the design till the marketing.
- Exponentially increasing revenue generation through strategic placement of ads on services.
- Lead developer of flagship project FFCS Planner, which is **used every semester by 15k+ college students**.

TOP PROJECTS

PhysioPlus (Efficient Patient Management System for Micro Clinics) – <https://physio-plus.netlify.app/>

July 2023

- **Developed** a user-friendly dashboard UI for displaying **216+ attributes** per patient for **300+ patients** over **2 clinics**
- **Programmed** a **multi user editable assessment system** with plotted pain scale **graphs**, and real time **dynamic updates**
- **Consolidated** patient details, treatment **trackers** with **downloadable discharge summaries** and **payment receipts**

SkillEase – Conversational AI Portal to find/create jobs, courses, sessions – <https://skillease.netlify.app/register>

February 2023

- 2 User types: Seeker can converse using **voice recognition** with **GPT 3.5-powered AI** to find courses, jobs, mentors.
- **AI creates the job posting, course structure, mentor description** from details given by Contributor, in **just 1 click**.
- Made using **React, React Redux** (State Management), **React Router, Tailwind CSS, Framer Motion**

Fully Flexible Credit System Planner – <https://ffcs-subhanu.netlify.app/>

November 2021

- A single page web app made in **ReactJS** and **TailwindCSS**, optimized to handle **3k+ concurrent** users on site.
- Overall **used by 30k+ students** in college. Helps VITians make their timetable by choosing desired course, faculty, time.
- USP - feature that generates **all possible timetables** as per chosen courses and time, using a **3D pathfinding algorithm**.

Vokal - Helping the mute to speak - <https://vokal.netlify.app/>

October 2021

- A web app that **combines the powers of gesture recognition and speech-to-text** ML models.
- Anyone can use **any of the recognized gestures** and get their own **voice instantly generated** in their desired **gender**.
- Built using **ReactJS, Tailwind** and gesture recognition model made using **TensorflowJS**.

ACHIEVEMENTS

- **HackRx 3.0 National First Runner Up** organised by **Bajaj Finserv**, out of 1000+ teams (Team of 2)
- **Winner** of IEEE-Women In Engineering hackathon WeHack 2022 powered by **Honeywell** (Team of 2) out of 500+ teams
- **SAWO Labs Track winner** at Hack This Fall 2021 out of **4500+ students**.
- Qualified in **Top 50 out of 18,000+** applications in **Samsung Solve For Tomorrow 2022**
- **Top 5 Finalists** in **Amadues 1Hack4Sustainability 2022** (Team of 2)
- **Finalist (Top 10 out of 3000+ Teams)** at **Siemens Healthineers SHIFT** hackathon – 2022 (Team of 2)
